Contents

1. Login to Samalive
2. Class List
3. Posts Tab
4. Members Tab
5. Virtual Sessions Tab
6. Completed Exams Tab
7. Resources Tab
8. Announcements
9. Class Management
10. Joining a Class

Login to Samalive

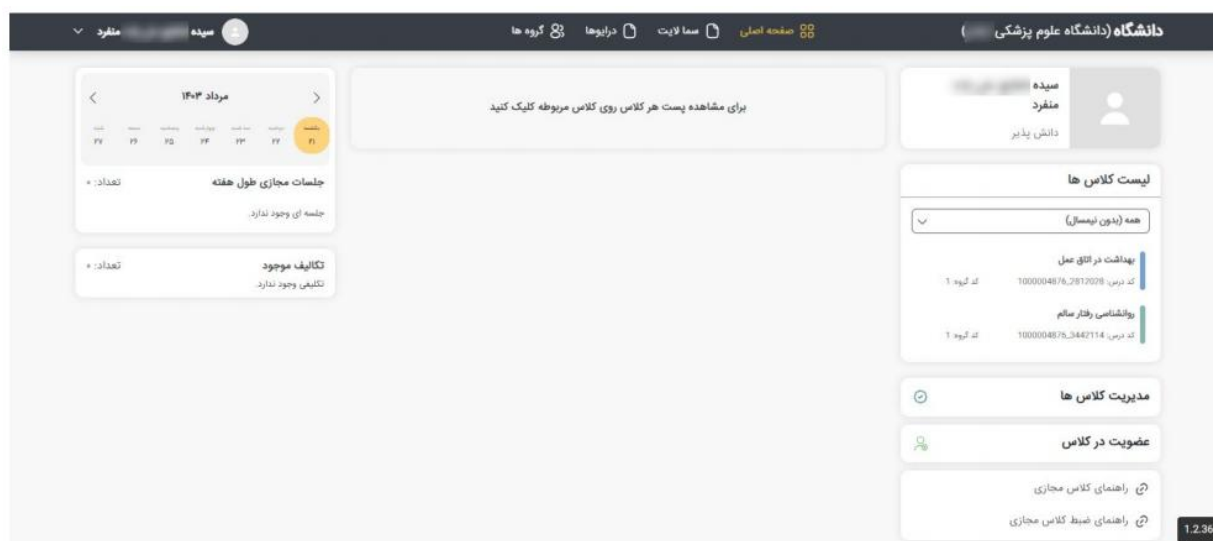

To access the Samalive system, enter <https://samalive.ir> in your browser.

<https://samalive.ir>

After entering the system, click on "Login with Sama System", select your university type and university, then use your Hamava username and password to enter Samalive.

After entering the user interface, you will see the following page:

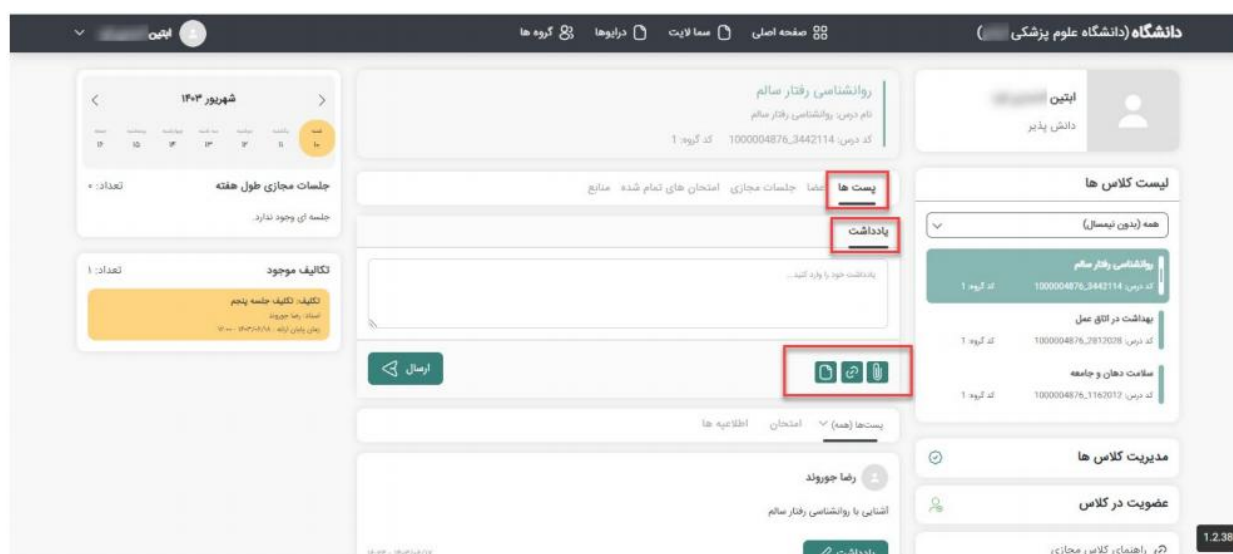

Class List

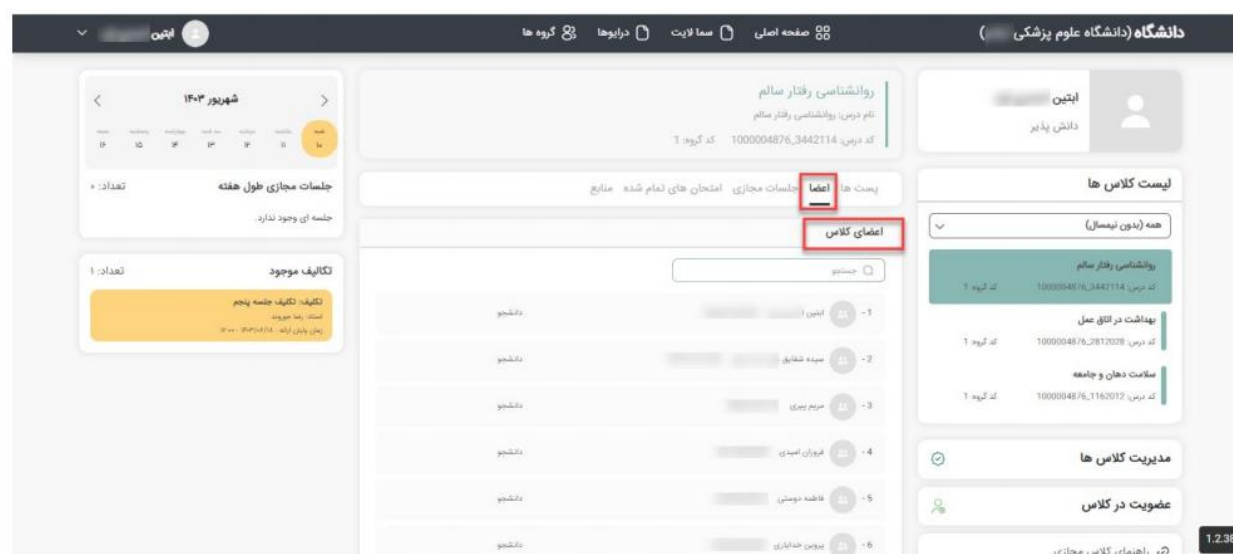

After the instructor transfers courses to Sama, the courses selected in the Hamava system will appear in the Class List section. Selecting a class displays the course name, course code, and group information.

Posts and Members Tabs

In the Posts tab, notes and assignments can be added by attaching links, adding files from the repository (library), or uploading files from your computer.

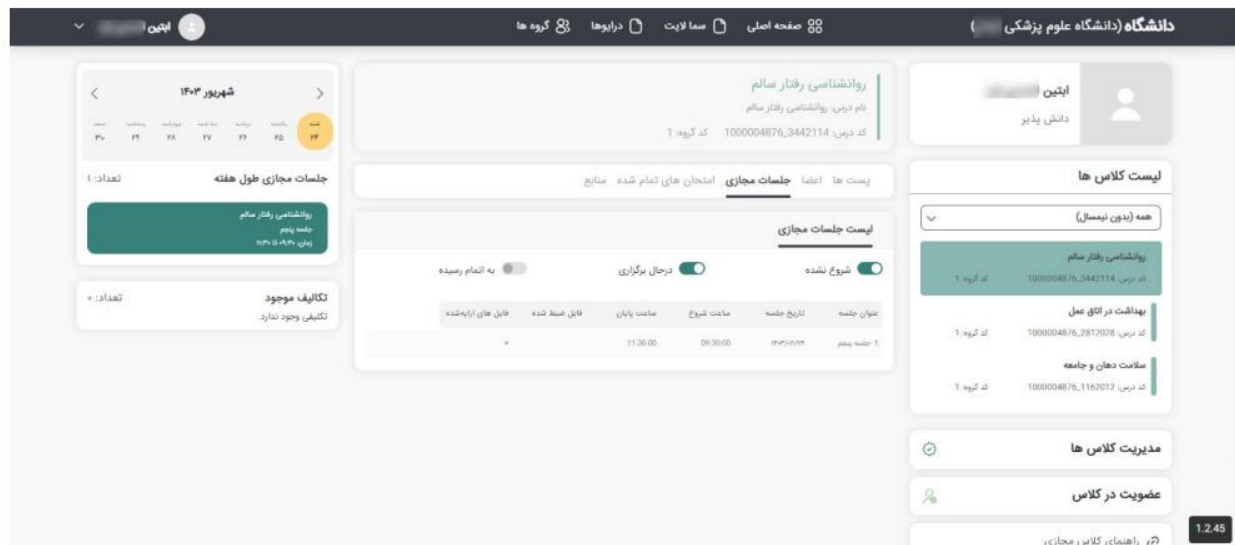

The Members tab displays class members and the course instructor.

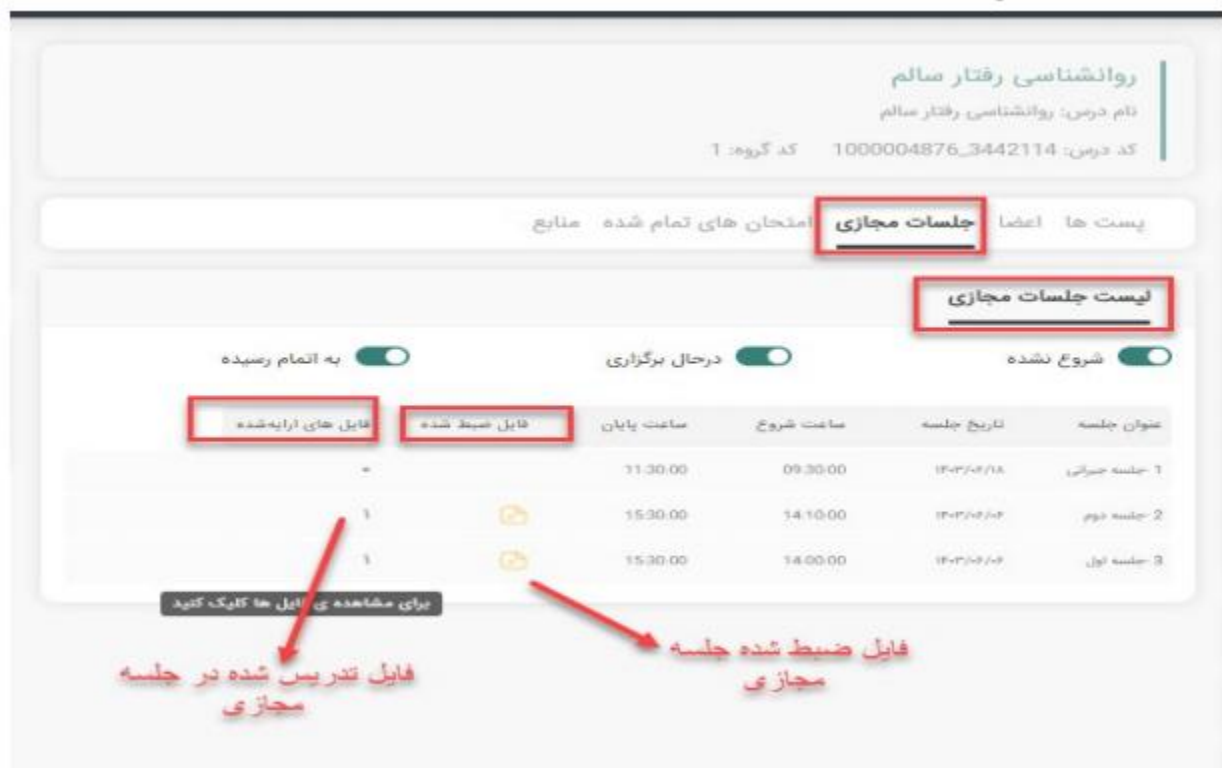

Virtual Sessions Tab

The Virtual Sessions tab displays sessions created by the instructor.

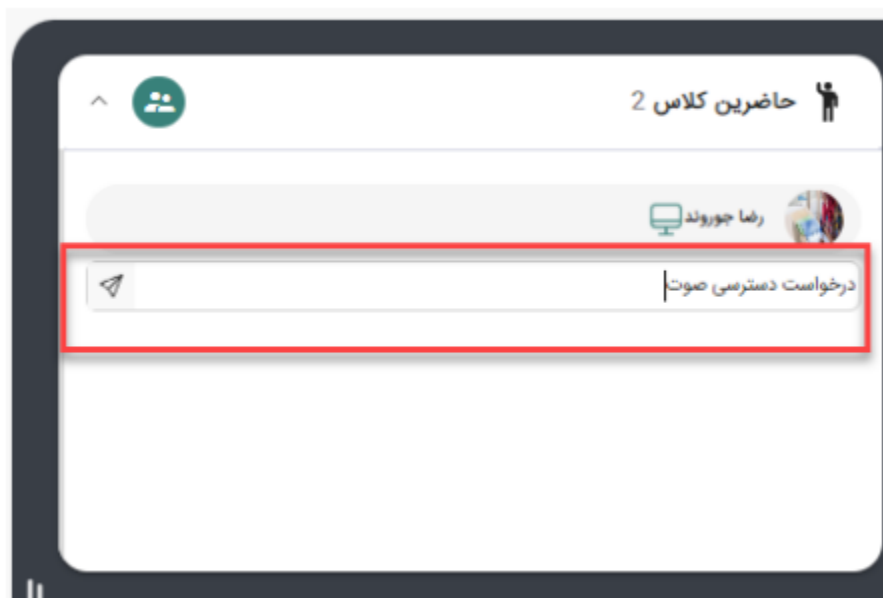

Recorded videos and teaching files can be downloaded from the recorded files and presented files sections. Access to the session is available five minutes before the class begins.

Virtual Session Functions

After sharing audio, video, or screen, the instructor can record the session using the Record button.

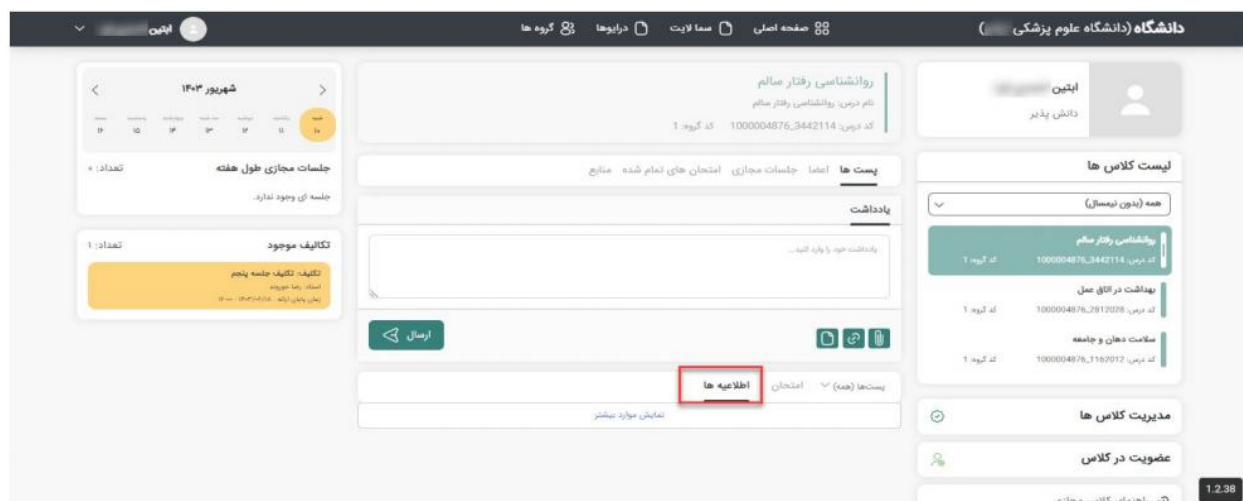

The instructor can grant audio and video access to students. Students may accept or reject access requests. After approval, students can speak and share video.

Completed Exams, Resources, Announcements, and Class Management

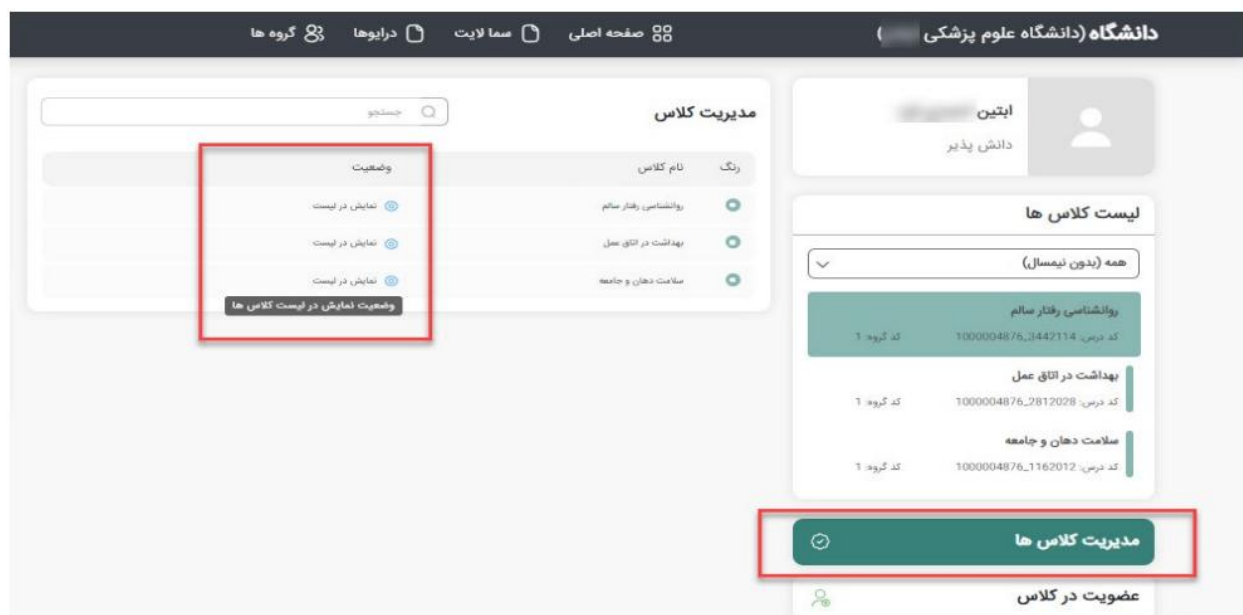

Completed exams are listed in this section. Selecting "Open Exam" allows viewing the exam score.

Course resources are entered by the instructor or system administrator. Important announcements are entered by the administrator and instructor. Class display settings can be managed in the Class Management section.

Class management

In this section, it is possible to set the display status of classes (show or hide).

Joining a Class

If you have a class code, you can join the related class. The code is usually a combination of numbers and uppercase and lowercase Latin letters.
